1.SIM Card

1.1 About SIM Card

Before using the phone, you must insert a valid SIM (Subscriber Identity Module) card(s) in the phone. A SIM card is provided by the network service provider.

All the information related to a network connection is recorded in the chip of SIM card. Also the names, telephone numbers and SMS that you choose to save are recorded in the SIM card. You can take out SIM card from your phone, and use it in any GSM mobile phone

(Most new mobile phones will read/recognize the SIM card automatically).

In order to avoid losing or damaging the information saved on the SIM card, please don't touch the metal contact surface of the SIM card, and place it away from electricity and magnetic force. You will not be able to use the phone if the SIM card is damaged.

- ***Prompt:*** Before inserting and taking out the SIM card, always make sure that the phone is switched off and disconnected from any external power source; otherwise both the phone and the SIM card may be damaged.

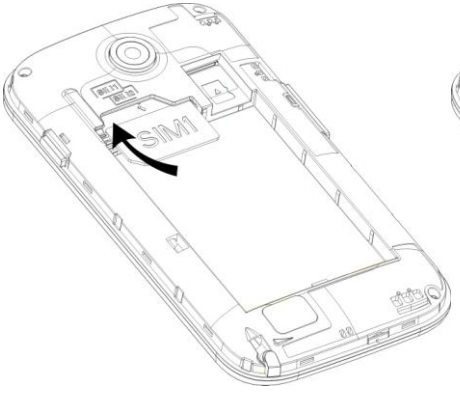
1.2 Installing and Uninstalling the SIM Card

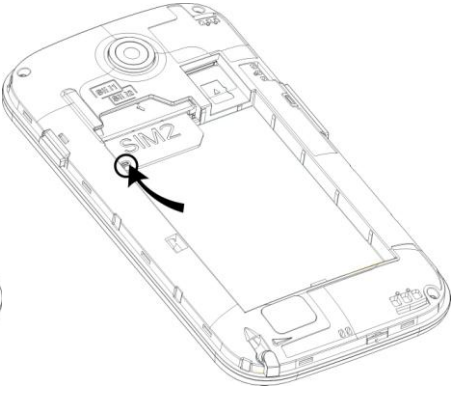
Metal contact surface of SIM card is easily damaged by scratching. You must be careful while trying to assemble it.

Power off the phone, remove the rear cover, battery or other external power supply. Align the beveled corner of the SIM card with the SIM card slot and insert the SIM card into the slot with its golden metal contacts facing downward.Your phone supports two SIm cards, you may install the other SIM card in the similar fashion.

To remove the SIM card, swich off the phone, disconnect any external power source, remove the battery and directly pull the SIM card outward..

Prompt: *Without special explanation installing both the SIM cards is defaulted in the manual. If only one SIM card is installed, some menu options might be hidden/ won't show.*



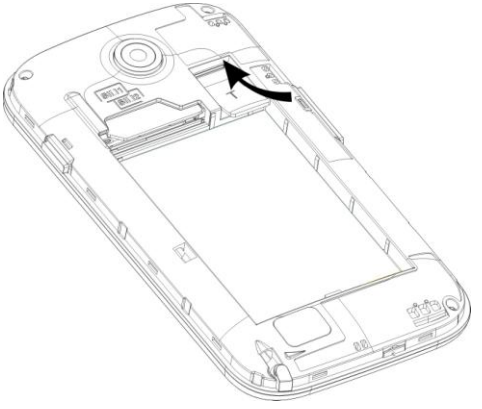


2.T-Flash Card

To store additional multimedia files, you must insert a T-flash/ memory card. To insert a T-flash card remove the back cover and the

battery. Insert the card gently with its metal contacts facing downwards. Replace the battery and the back cover.

To remove the T-flash card, first unmount the same for safe removal In idle mode, open the applications list and select **Settings>Storage>Unmount SD card** Remove the back cover and the battery. Gently pull the T-flash card out.



3. Installing and Uninstalling the Battery

To install the battery, remove the back cover of the phone. Align the golden contacts of the battery with the contacts on the battery compartment of the phone. Gently snap the battery down in place. To uninstall, flip the battery out of the battery compartment.

4. Charger

Insert the charger into the charging interface at the top of the phone. Connect the charger to an AC wall socket. The battery strength indicator icon at the top right corner of the screen starts scrolling, indicating that the charging is in process. When the batteryis fully charged the icon stops scrolling.

Prompt: *In order to ensure normal operation of the phone, please make sure to use only the approved chargers. Failing to comply with this will violate the Limited Warranty terms and conditions of your phone*

5.1USB Disk Identification

After a USB disk is inserted, you can deal with data in USB disk after its light is on. Please refer to “File Manager” for the usage of USB Disk.

5.2Transferring Data With Computer

4.2.1Install USB

Connect mobile phone to a computer with a USB cable, drag down the Notification bar. Touch “USB Connected”, choose and click “USB Storage”, then on the computer, you can view data in Device and SD Card storage. So data transfer can be performed between this device and the computer.

4.2.2Disconnect USB

After data is mounted onto the computer, you can drag down the Notification bar, touch to turn off “USB Storage”, and then disconnect with USB link.

Prompt*: It is forbidden to disconnect USB link during transferring data, because it can lead to data loss or damage.*

Quick User Guide

The phone supports not only the basic functions of a mobile phone, but also supports rich, practical and rapid feature functions, which can be briefly introduced as follows:

To save power, you can set the time of screen timeout at 15 seconds, 30 seconds, 1 min, 2 mins, 10 mins, or 30 mins.

20.6.5 Gravity Calibration Utility

Calibrate the accelerometer sensor.

20.7 Location & security

You can set My Location or Screen Unlock or SIM Card Lock or Passwords or Credential Storage.

20.7.1 My Location

Touch this item to switch between “On” and “Off”. If it is “On”, the device location can be determined by WLAN.

20.7.2 Screen Unlock

You can set Set up screen lock.

- ✧ **None:** Disable screen unlock security.
- ✧ **Pattern:** Draw pattern to unlock screen.
- ✧ **PIN:** Enter a numeric PIN to unlock screen.
- ✧ **Password:** Enter a password to unlock screen.

20.7.3 SIM Card Lock

You can set up SIM1 or SIM2 card lock.

- ✧ **Lock SIM1 or SIM2 Card:** Set Lock SIM1 or SIM2 on or off.
- ✧ **Change SIM1 or SIM2 PIN:** Change SIM1 or SIM2 PIN.

20.7.4 Passwords:

You can set Visible passwords on or off.

20.7.5 Device Administration

Add or remove device administrators.

20.7.6 Credential Storage

You can set Credential Storage.

- ✧ **Use Secure Credentials:** Set Use Secure Credentials on or off, to allow applications to access to secure certificates and other credentials.
- ✧ **Install From SD Card:** Install encrypted certificates from SD card.
- ✧ **Set Password:** Set a password for the credential storage.
- ✧ **Clear Storage:** Clear credential storage of all contents and reset

its password.

20.8 Applications

20.8.1 Unknown sources

The third party application can be installed only if this function is initiated. Otherwise, any third party application can't be installed.

Note: *When installing or using the third party applications, please take care! Only the user is responsible for the data damage or data loss, etc. that may result from the installation and use of the third party application.*

20.8.2 Manage Applications

User can manage and remove the installed applications.

20.8.3 Running services

User can view and control currently running services.

20.8.4 Storage use

View storage user by applications.

20.8.5 Development

Set the options for application development.

- ✧ **USB Debugging:** Open or close USB debugging mode when USB is connected.
- ✧ **USB settings:** Set USB connection, Charge Only, USB tethering, USB storage, Remenber my choice.
- ✧ **Stay Awake:** The screen will never sleep during charging if this function is "On"; If it is "Off", the screen can sleep during charging.
- ✧ **Allow Mock Locations:** The position can be simulated during debugging.

20.9 Accounts & Sync

You can perform adding accounts and Sync settings.

20.9.1 General Sync Settings

- ✧ **Background Data:** Set Background Data on or off, and it can sync & send & receive data at any time.
- ✧ **Auto-Sync:** Set Auto-Sync on or off.

20.9.2 Add Accounts

Add account to Twitter, Corporate, Facebook, Google

20.9.3 Manage Accounts

You can manage/ delete sync accounts.

20.10 Privacy settings

20.10.1 Backup and restore

You can back up application data, WLAN passwords, and other settings to Google servers.And you can automatically restore backed up settings.

20.10.2 Personal Data

You can perform Factory Data Reset.

Note: *Performing factory data reset will clear user data in mobile phone, please ensure backing up your data before using this feature.*

20.11 Storage

20.11.1 SD Card

- ✧ **Total Space:** View the capacity of SD card when SD card is inserted.
- ✧ **Available Space:** View the available space of SD card.
- ✧ **Unmount SD Card:** You can unmount SD Card for safe removal.
- ✧ **Erase SD Card:** You can erase all data on the SD card.

20.11.2 Internal Phone Storage

- ✧ **Available Space:** View the capacity of RAM.

20.12 Language & Keyboard

20.12.1 Select Language

You can select language, the default language is English.

20.12.2 User dictionary

Press **[** Menu **]** to add words to User Dictionary or delete words.

20.12.3 Android keyboard

- ✧ **Android keyboard settings:** Includes **Vibrate on keypress, Sound on keypress, Popup on keypress, Touch to correct words, Auto-capitalization, Show settings key, Input languages, Quick fixes, Show suggestions, Auto-complete**.

20.13 Voice Input & Output

You can perform Voice Input & Output Settings such as Text-to-speech.

20.14 Accessibility

Manage accessibility options. You can choose the Power button to end the call instead of turning off the screen when pressed.

20.15 Date & Time

20.15.1 Automatic

Touch this item to switch between “On” and “Off”. If it is set as “On”, it updates the date and time automatically. This function is based on the services provided by the network.

Note: *When this item is initiated, “Set Date”, “Select Time Zone” and “Set Time” are not available.*

Touch this item to switch between “On” and “Off”. If it is “On”, system time is in 24-hour format, otherwise, it is in 12-hour format.

20.15.6 Select Date Format

Select one item to set date format.

20.16 About Phone

20.16.1 System updates

20.16.2 Status

You can check and view “ Phone Number”, “Network”, “Signal Strength”, “Mobile Network Type”, “Service state” , “Roaming”,

“Mobile network state” , “IMEI”, “IMEI SV”, “Battery Status”, ”Battery Level”, “WLAN MAC address”, “Bluetooth address” and “Up time”, etc.

20.16.3 Battery use

Check the battery being consumed by each application.

20.16.4 Legal information

Check the open source license.

20.16.5 Model number

Displays the device model number.

20.16.6 Android version.

Displays the device’s Android version.

20.16.7 Baseband version.

Displays the device’s Baseband version.

20.16.8 Kernel version

Displays the device’s kernel version

20.16.9 Software version

Displays the device’s software version.

20.16.10 Hardware version

Displays the device’s hardware version.

Troubleshooting

This section lists some problems that you might meet while using your phone. If you feel that your phone do not operate normally, please reset settings first, and then follow Troubleshooting Guide. If you are still unable to solve problems, please contact the authorized service center or the store from where you purchased the phone.

1. My Phone would not power on?

Possible Reasons for Malfunction	**Solutions**
1. Press **[Power]** key shorter.	Long press [Power] key over 3 seconds
2. Battery has run out.	Charge your battery for a few

	minutes then try power on again.
3. The battery is installed incorrectly.	Check if the battery is seated correctly on the device.
