- ✧ **Install SIM card and Battery**

You can install two SIM cards (GSM+GSM) in the phone, at the same time. When installing a SIM card, ensure that the golden contact area on the SIM card is facing downward, and the beveled edge of the SIM card is properly aligned with that of the card slot.

For the battery, ensure the polarities fit into the socket pins of the phone properly.

For the battery cover, fix the top hooks of the back panel to the phone body and press the battery cover on to the phone, as shown above.

❖ For battery charging

When the battery power is low, mobile phone will emit a warning tone. In this case, you may not be able to use some of the functions that consume a lot of battery in the phone.

If the battery is low, the mobile phone will automatically shutdown. To avoid this, put the mobile phone on charging.

The battery icon will flash on the screen. After charging, the screen will display the full lattice of battery icon (no longer flashing). To charge the device:

1、Connect the charger into an AC power supply socket.

2、Phone charging indicator will appear on the screen.

3、When the battery is charged, remove the charger from the socket and the mobile phone

### Power on and off

In the off state, long press [power key] to start the phone.
