## 4 User Guide

### 4.1 Installing the battery

- ◇ With the top of battery (the terminal with pole) facing right toward the contacting points in the battery compartment, press the bottom of battery slightly until it enters into place;
- ◇ Slide battery cover forward along the side slot until it clicks into place.

### 4.2 Charging the battery

Your phone is powered by a rechargeable battery. When the battery is weak, the battery sensor informs you. At this time, you need charge the battery. When the battery becomes too weak for the phone to operate, it switches off automatically.

- 1) Plug the charger into the charger port at the bottom of the phone, and then plug the other end of the charger into the appropriate electrical outlet.
- 2) When charging is complete, disconnect the connector from the phone and unplug the charger from electrical outlet.

**\* Notice:**

- i) Charging with phone on, battery icon scrolling on the display.
- ii) During charging, the phone can operate as usual. But the charging time increases.

- 
- iii) Charging with phone off, the display says 'Charging' with charging indicator icon flash.\*

### **4.3 Inserting the SIM card**

The mobile support two SIM cards on-line at one time. The method of the two SIM cards of inserting or removing is same.

- ✧ Remove the battery;
- ✧ Contacting points downwards. Ensure the angled corner is positioned correctly and slide the card into the carrier;
- ✧ Insert battery.

**※Note:**

- (a) Be careful when handling, inserting or removing the SIM card, friction or bending may damage SIM card.
- (b) If left unused, keep SIM card out of the reach of small children.
- (c) Keep SIM card away from static, dusty and water.
- (d) When inserting or removing SIM card, always make sure that the phone is switched off before you remove the battery. Or the SIM card memory might be damaged. ※

### **4.4 T-Flash card use**

#### **4.4.1 Installing T-Flash card**

This mobile supports the Dual T-Flash card feature. Make sure that the T-Flash card has already inserted into mobile. You can put 2 Memory cards into the phone and enjoy its contents

Maximum support is 32 +8 GB

- ✧ Power off, and remove the battery;
- ✧ Make contacting points downwards. Ensure the angled corner is positioned correctly and slide the card into the carrier;
- ✧ Lock it.

---

#### 4.4.2 T-Flash card use

The music and video file are saved in the T-Flash card. If you need operate with the files, the files must be saved in the card firstly.

#### 4.5 Power On or Off

Make sure the battery is already inserted:

- 1) Power On: Hold down end key until the phone-on image display. After power on, the phone searches for your network automatically. Some SIM card is protected by the PIN number, if you are asked for inputting the PIN number, please enter it, then press left soft key.
- 2) Power Off: Hold down end key until the power-off image display.

**※Note:**

- (a) PIN is provided by your service provider. If the PIN is entered incorrectly three times, the SIM card is barred.
- (b) If the phone asks for an unlock code when switched on, enter the unlock code and press left soft key. ※

## 5 Call Functions

### 5.1 Making a Call

When you want a call, press the phone keypad to input the area code and phone number. Click middle key to save, select To SIM1/2, or To phone.

Press and hold down \* Key until character “+” appears, and then you can dial an international number. (The ‘+’ stands for international dial code.) Press dial key to dial the number. If the number is stored with a name, it appears on the display when you dial the number.

Only in GSM system coverage, you can make an emergency call, even though the phone is locked, without SIM card, or cannot

---

enroll to the system.

- **Quick making a call**
